SAFETY CHECK-OUT

(US model only)

After correcting the original service problem, perfor the following safety checks before releasing the set to the customer:

- Check the area of your repair for unsoldered or poorly-soldered connections. Check the entire board surface for solder splashes and bridges.
- 2. Check the interboard wiring to ensure that no wires are "pinched" or contact high-wattage resistors.
- Check that all control knobs, shields, covers, ground straps, and mounting hardware have been replaced. Be absolutely certain that you have replaced all the insulators.
- 4. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
- Look for parts which, through functioning, show obvious signs of deterioration. Point them out to the customer and recom mend their replacement.
- Check the line cords for cracks and abrasion. Recommend the replacement of any such line cord to the customer.
- 7. Check the condition of the monopole antenna (if any). Make sure the end is not broken off, and has the plastic cap on it. Point out the danger of impalement on a broken antenna to the customer, and recommend the antenna's replacement.
- 8. Check the B+ and HV to see they are at the values specified.

 Make sure your instruments are accurate; be suspicious of your HV meter if sets always have low HV.
- Check the antenna temminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

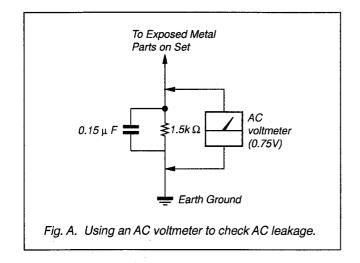

LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5mA (500 microampers). Leakage current can be measured by any one of three methods.

- A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
- 2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
- 3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75V, so analog meters must have an accurate lowvoltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

HOW TO FIND A GOOD EARTH GROUND

A cold-water pipe is guaranteed earth ground; the cover-plate retaining screw on most AC outlet boxes is also at earth ground. If the retaining screw is to be used as your earth-ground, verify that it is at ground by measuring the resistance between it and a cold-water pipe with an ohmmeter. The reading should be zero ohms. If a cold-water pipe is not accessible, connect a 60-100 watts trouble light (not a neon lamp) between the hot side of the receptacle and the retaining screw. Try both slots, if necessary, to locate the hot side of the line, the lamp should light at normal brilliance if the screw is at ground potential. (See Fig. B)

SECTION1 GENERAL

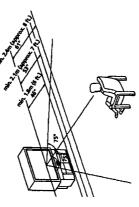

The operating instructions mentioned here are partial abstracts from the Operating Instruction Manual. The page numbers of the Operating Instruction Manual remein as in the manual.

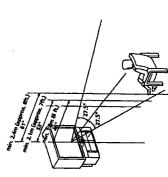

Getting Started

the projection TV Step 1: Installing

For the best picture quality, install the projection TV within the areas shown below.

Optimum viewing area (Horizontal)

Carrying your projection TV

Be sure to grasp the portions indicated when carrying the projection TV, and to use more than two people.

Rear of projection TV)

Preparing for your projection TV

Before you use your projection TV, adjust convergence. For the procedure, see "Step 4: Setting up the projection TV automatically (AUTO SET UP)" on page 13.

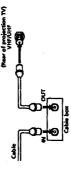

Connections Step 2:

Connecting an antenna/cable TV system without a VCR

To cable or antenna 2 Per

To cable box

If your cable company requires you to connect a cable box, make the connection as follows:

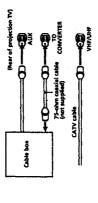

To cable box and cable

Connect your antenna cable to the VHF/UHF antenna terruinal. If you cannot connect your anterna cable directry to the terrainal, follow one of the instructions below depending on your cable type.

To an antenna

Although you can use either an Indoor antenna or outdoor antenna with your projection TV, we recommend connecting to an outdoor antenna or a cable TV system for improved picture quality.

window picture.

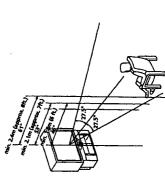

EAC-66 U/V mixer (not supplied)

1

Do not connect anything to the TO CONVEKTER connector in this case.

Optimum viewing area (Vertical)

Notes

Most VHF/UHF combination antennas have a signal splitter.
Remove the splitter before attaching the appropriate councetor
if you use the U/V mixer, show and notes may appear in the
picture when viewing cable TV channels over 37(W+1).

Getting Started | 5-EN

Connecting an antenna/cable TV system with a VCR

For details on connection, see the instruction manual of your VCR. Before connecting, disconnect the AC power cords of the equipment to be connected.

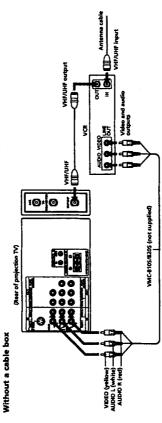

After making these connections, you will be able to do

the following:

• View the playback of video tapes

• Record one TV program while viewing another program

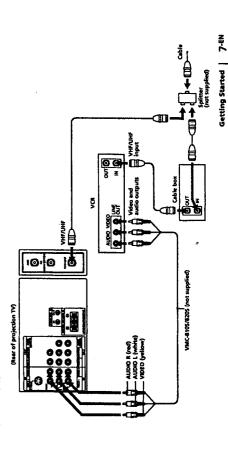

To a conventional VCR

To connect a monaural VCR, connect the audio output of the VCR to AUDIO L (MONO) of VIDEO 1/3 IN on the projection TV.

Do not connect the cable to the S VIDEO connector on the projection TV.

With a cable box

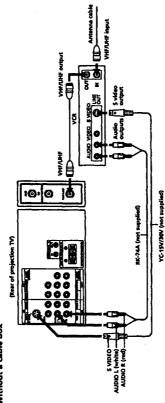

To an S video equipped VCR If your VCR has an S video output jack, make the

connection as follows.

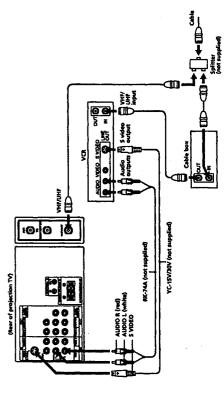

Whenever you connect the cable to the S VIDEO connector, the projection TV automatically receives \$ video signals.

Without a cable box

Video signals are composed of Y (luminance) and C (chroma) signals. The S connection sends the two signals separately preventing degradation, and gives better picture quality compared to conventional connection.

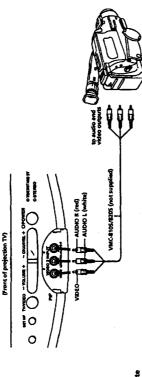

With a cable box

8-EN | Getting Started

Connecting a camcorder

This connection is convenient for watching the picture from a camcorder.

To connect a monauzal camcorder, connect the audio output of the camcorder to AUDIO L (MONO) of VIDEO 2 INPUT on the projection TV.

Connecting two VCRs for tape editing using VIDEO 3 IN and OUT

You can watch input images different from the image

being recorded.
The VIDEO 3 OUT jacks output only the signal from
The VIDEO 3 OUT jacks output only the signal from
The VIDEO 3 IN Jacks. If you make the connection as
shown below, you can watch images from either
antenna, cable, VIDEO 1 IN or VIDEO 2 INPUT jacks

during recording.

0.0 10 VMC-8105/8205 (not supplied) (Rear of projection TV) to video VMC-8105/8205 (not supplied) VCR (for playback) \$ 6 G

Connecting two VCRs for tape editing using MONITOR OUT

You can record input images displayed on the screen.
This type of connection should be used only when you connect from the line input of one VCR, and from the line output of a second VCR.

VCR (for 1010 0

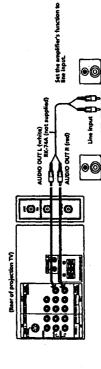

VCR (for playback)

Do not change the input signal while editing through MONITOR CULT, or the coupue; signal will also change:
 When connecting, a single VCR to the projection TV, do not connect MONITOR CUIT to the VCR's line input, while at the same time connecting from the projection TV's VIDEO IN jects to the VCR's line output.

You can use the S VIDEO conector to connect a VCR for playback and either S VIDEO connector or composite video jack to connect a VCR for recording.

Connecting an audio system

When connecting audio equipment, see page 25 for more information.

Note

• You can adjust the bass, trable and balance, or select surround, an MTS (Multichannel TV Sound) or OSE (Orchestra Seat Effect) mode with the supplied remote commander.

10-EN | Getting Started

Getting Started | 9-EN

Using the projection TV speakers as center speakers

amplifier's center channel output terminals to the projection TV's CENTER SPEAKER IN. Both right and left terminals must be connected to receive an audio This feature allows you to enjoy the benefits of Dolby Pro Logic by using the speakers of the projection TV as the center speaker. To utilize this system, you must signal. After making the right connections, select

To cancel a CHANNEL BLOCK setting Press RESET on the remote commander

Note

• If the CHANNEL BLOCK and ON/OFF TIMER settings are overlapped, the later time setting has priority over the other setting.

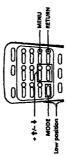

1. EVERY SATURDAY 12:00- -- CH---2. -- -- CH----CHENU Sel 1he Lime Exit BB G CHANNEL BLOCK

buttons (ch CAPTION/ **Customizing the** channel number GUIDE)

You can choose up to 12 channels, caption each channel, and assign a specific channel number button to each channel. This feature allows you to select your favorite channels easily by name. For example, you can name channel 20 "ESPN," and assign the channel number 4 button to it.

Setting captions to favorite channels

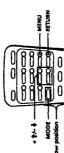

Press MENU.

6 Press + ↑ or - ↓ to select the channel that you want to caption and press RETURN.

- Press + † or 4 to select SET UP and press
- Press + ↑ or ↓ to select CH CAPTION/GUIDE and press RETURN.

(2) Press RETURN

7 Enter the letters or numbers (up to four) to caption the channel:
(1) Press + ♣ or - ♣ to select the first letter

(number).

Each time you press + † or - †, the letter (number) changes as shown below.

- RETURN.

4 Press RETURN again.

(3) Repeat steps (1) and (2) to select the remaining letters (numbers) and press RETURN.

8 Repeat steps 4 to 7 to caption other channels.

5 Press + f or - 4 to select a channel guide number button and press RETURN. Each time you press + for - 4, the channel positions change to red in turns. The channel number button you select will be the one you press

to call up your favorite channel.

To erase a caption Press RESET after step 4.

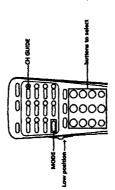

The position number you already selected appears in yellow.
 If the ACH CAPTION/GUIDS ment appears in black, the projection TV is set to a video input, and you cannot select CH CAPTION/GUIDS. Press TV so that a channel number

- a pressar.

 If more than 90 seconds elepse after you press a button, the menu disappears automatically.

 The channel caption/guide insture is available for the ALX input input.

Selecting a captioned channel

The CHANNEL GUIDE menu appears showing channel captions and the corresponding channel number buttons. Press CH GUIDE.

Press a channel number button, the DISPLAY or ENTER button to select the channel you want.

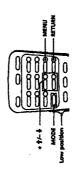

~

To cancel the CHANNEL GUIDE menu

Setting video labels

(VIDEO LABEL)

This feature allows you to label each input mode so that you can easily identify the connected equipment. For example, you can label VIDEO 1 IN as VHS.

- Press MENU.
- Press + + or + to select SET UP and press RETURN.
- Press + ↑ or ↓ to select VIDEO LABEL and press RETURN. m

Press + ‡ or − ↓ to select the input mode you want to label and press RETURN. 4

Press CH GUIDE again.

5 Press + † or - + to select the label and press

Each time you press $+ \uparrow$ or $- \downarrow$, the label changes as shown below.

VIDEO 1→5-VIDEO→BETA→8mm→VHS→LD→DSS

VIDEO 2→BETA→8mm→VHS→LD→DSS VIDEO 2

VIDEO 3→BETA→8mm→VHS→LD→DSS VIDEO 3

Repeat steps 4 and 5 to label other input

If more than 90 seconds elapse after you press a button, the menu disappears automatically.

Displaying Caption Vision

(CAPTION VISION/XDS)

FEXTY, TEXTZ, TEXT3 or TEXT4 shows you text, that is information presented using either half or the whole screen. It is not usually related to the program. Some programs are broadcast with Caption Vision. To display Caption Vision, select either CCI, CC2, CC3, CC3, CC3, TEXT1, TEXT3, OT TEXT4 from the menu. CC1, CC2, CC3 or CC4 shows you a caption, that is a printed version of the dialog or sound effects of a program. (The mode should be set to CC1 for most programs.)

2 Press + † or - 4 to select CAPTION VISION XDS and press RETURN. 1 Press MENU.

3 Press + ↑ or - ↓ to select the caption type and press RETURN.

The selected caption type is colored green.

Each time you press DISPLAY, the display changes as on-screen information—XDS*—Caption Vision or Text To turn off the captions or text Press DISPLAY on the remote commander. follows:

"DISPLAY OFF" goes off after three seconds.

Some programs are broadcast with XDS service which shows a
metwork name, program name, program length, call letters and
time in show data.
 When you select XDS with the DISPLAY button, this
information will be displayed on the screen if the broadcaster
officer this service.

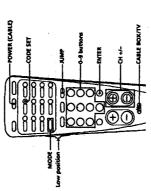

offers this service.

Note

- Captions may appear with a white box or another error instead
of a cretain word. Poor reception of TV programs can also
cause errors in Closed Caption.

Operating a cable

You can operate a connected cable box with the supplied remote commander. Before operating, set the manufacturer's code number.

1 Set the CABLE BOX/TV selector to CABLE BOX.

2 While pressing CODE SET, press 0 – 9 to enter the manufacturer's code number (see the chart below) and press ENTER. For example, to operate a Zenith cable box, press 6 and 8 and press ENTER.

3 Use POWER (CABLE) and the projection TV control buttons (0 - 9, ENTER, JUMP and CH+/-) to operate the cable box.

To operate the projection TV
Set the CABLE BOX/TV selector to TV. Then use the
projection TV control buttons to control the projection
TV,

For more details on operating the cable box Refer to the operating instructions that come with the cable box.

Manufacturers and code numbers (cable box)

Code number	60, 61, 62, 63, 64, 65, 73	04,70	66,67	7,72	89
Manufacturer	JERROLD	PIONEER	SCIENTIFIC ATLANTA	TOCOM	ZENITH

If more than one code number is listed, try entering them one by one until you come to the correct code for your equipment.

If you enter a new code number, the code number you previously entered at that setting is erased.

I some rare case, your equipment into use a code that is not provided with this remote commander and you may not be provided with this remote commander and you may not be other in this case, use the equipment's own remote commander. In this case, use the equipment's own remote control unit.

Often you remove a battery from the remote commander, the code may be erased. Reset the code each time you replace the battery. If necessary.

EQUIPMENT AND SIGNAL		
ADJUSTMENT ITEM AND PROCEDURE	 Check that the Static Voltmete reading is *31.0 ± 0.4 kVDC. If the Static Voltmete reading is *30.5 kV or lower, remove resistor *R808 and mount *5.6 kΩ 1/4W RN at *R983. If the Static Voltmete reading is *31.4 kV or higher, remove resistor *R808 and mount *8.2 kΩ 1/4W RN at *R983. If the Static Voltmete reading is *32.0 kV or higher, remove resistor *R808 and mount *10.0 kΩ 1/4W RN at *R983. If any of Items 5, 6 or 7 has been implemented, check Item 4 again. 	HV HOLD DOWN AND HV REGULATOR SIMPLE ADJUSTMENT It is normally desirable that the HV hold down and HV regulation checks use a high-voltage meter. However, sometime one is not available, for example in the field, below is a simple adjustment method. When replacing parts with the Mark, replace both the resistors with the Mark *R808 (R988) and *R809 (R983) with resistors one rank lower in the E-12 series. Do not replace just one of these resistors! Always replace both with resistors one rank lower.

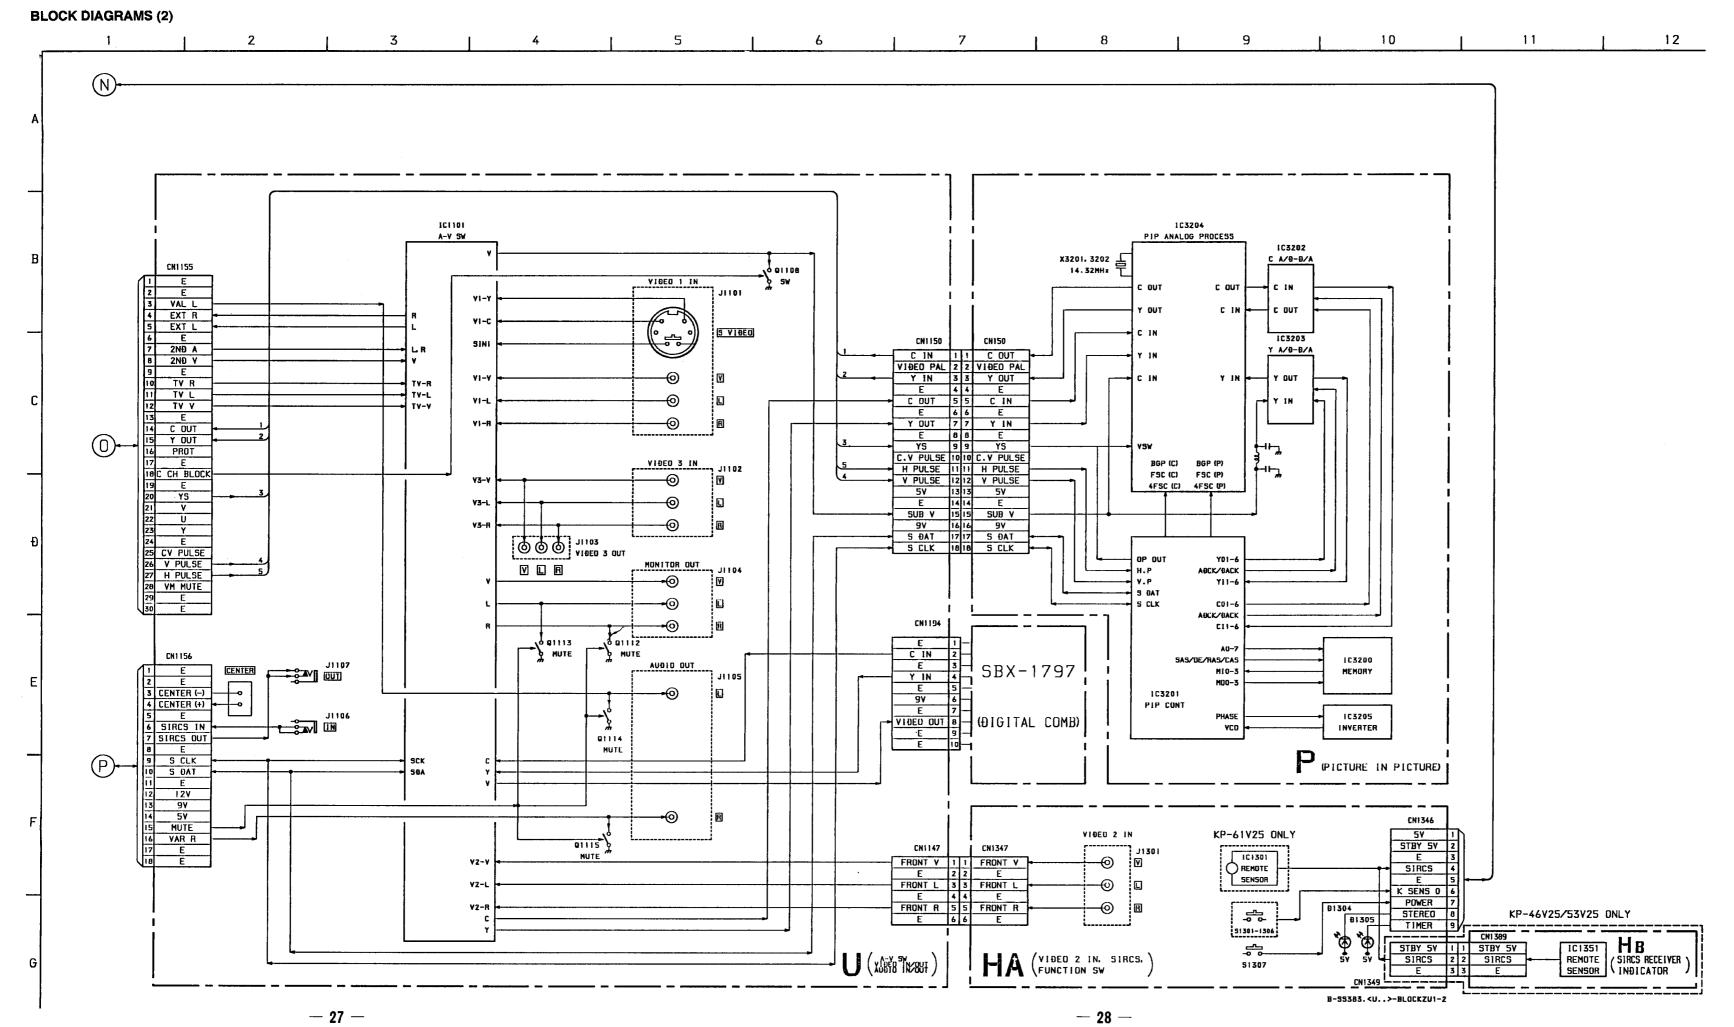

ADJUSTMENT ITEM AND PROCEDURE	EQUIPMENT AND SIGNAL	MEASUREMENT POSITION	ADJUSTMENT LOCATION	ILLUSTRATION AND SHAPE AND NUMBER
OVERVOLTAGE PROTECTION (OVP) OPERATIONS CHECK				
1. Connect a *220 kΩ variable resistance rheostat to the G board C655 (between Pins ③ and ⑤ of IC651).				1 / 1

 Input *120.0 ± 1.0 VAC, 60 Hz power. Receive the *Dot signal and set the *PICTURE and BRIGHTNESS settings to their minimums. 	*Dot pattern		* PICTUREminimum RRIGHTNESS	*120.0 ± 1.0 VAC, 60 Hz
 4. Gradually lower the value of the connected variable resistance and check that when the +B line *voltage is *143.5 ± 5.5 VDC, the overvoltage circuit operates and the rasters disappear. 5. Remove the variable resistor and check the +B line voltage. 	*Digital Multimeter		minimum	* 143.5 ± 5.5 VDC
BEAM CURRENT (SIK) PROTECTION CIRCUIT CHECK 1. Connect the *ABL ammeter between *Pins ① and ④ of the CN884 on the E board. Have Pins ② and ③ open.	* Ammeter			* CN884 (E board) 5 0 0 0 0 1 ABL ammeter
2. Input *120.0 ± 1.0 VAC, 60 Hz power.3. Receive a *monoscope signal and set the *PICTURE and BRIGHTNESS settings to their minimums.	* Monoscope pattern		*PICTURE minimum BRIGHTNESS minimum	*120.0 ± 1.0 VAC, 60 Hz

4-2. CIRCUIT BOARDS LOCATION

4-3. PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS

- All capacitors are in μF unless otherwise noted. pF: μμF 50WV or less are not indicated except for electrolytics and tantalums.
- All resistors are in ohms.
- $k\Omega = 1000 \Omega$, $M\Omega = 1000k\Omega$
- Indication of resistance, which dose not have one for rating electrical power, is as follows.

Pitch : 5mm Rating electrical power: 1/4W

- : nonflammable resistor. • tusible resistor.
- △ : internal component.
- : panel designation and adjustment for repair.
- All variable and adjustable resistors have characteristic curve B. unless otherwise noted.
- بلر : earth-chassis.
- The components identified by M in this basic schematic diagram have been carefully factory-selected for each set in order to satisfy regulations regarding X-ray radiation.
- Should replacement be required, replace only with the value originally used.
- When replacing components identified by , make the necessary adjustments indicated. If results do not meet the specified value. change the component identified by M and repeat the adjustment until the specified value is achieved.

(Refer to R808, R809, R983 and R988 adjustment on Page 18 - 22.)

• When replacing the part in below table, be sure to perform the related adjustment.

SECTION 6 ELECTRICAL PARTS LIST

NOTE:

Les composants identifies par une trame et une marque \(\Lambda\) sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

The componants identified by shading and mark ⚠ are critical for safety.
Replace only with part number specified.

- The components identified by
 In this manual
 have been carefully factory- selected for each set
 in order to satisfy regulations regarding X-ray
 radiation. Should replacement be required,
 replace only with the value originally used.
- Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.

When indicating parts by reference number, please include the board name.

- CAPACITORS PF : μμ F
- There are some cases the reference number on one board overlaps on the other board. Therefore, when ordering parts by the reference number, please include the board name.

RESISTORS

- · All resistors are in ohms
- F: nonflammable

• F : nonflammable

Les composants identifies par une trame et une marque Δ sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

The componants identified by shading and mark \triangle are critical for safety. Replace only with part number specified.

							piece portain le m	ariero apecilie.	specified.

The componants identified by shading and mark ∆ are critical for safety.
Replace only with part number specified.

Les composants identifies par une trame et une marque \(\hat{\Lambda}\) sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

Les composants identifies par une trame et une marque Å sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

The componants identified by shading and mark ∆ are critical for safety.
Replace only with part number specified.

specified.

 The components identified by
in this manual have been carefully factory- selected for each set in order to satisfy regulations regarding X-ray radiation. Should replacement be required, replace only with the value originally used.

Les composants identifies par une trame et une marque ∆ sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie. The componants identified by shading and mark ∆ are critical for safety. Replace only with part number specified.

		replace only with the value	originally use	u.						#

The componants identified by shading and mark \triangle are critical for safety.

Replace only with part number specified.

Les composants identifies par une trame et une marque A sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

Les composants identifies par une trame et une marque Å sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

The componants identified by shading and mark ∆ are critical for safety.
Replace only with part number specified.
